HG rust remover

- Eliminates rust easily
- Also protects against rust reformation
- After treatment the surface can be painted

HG "rust remover" is specially formulated for the removal of rust from garden tools, garden furniture, skates, locks, nuts and bolts, tools, grills and other metal objects.

Direction for use: Scrape or (wire) brush off loose dust. Dilute 1 bottle of HG "rust remover" (0.5 litre) with 2.5 litres of water (1:5). Place the object in the solution so that it is completely immersed. Treat large or fixed objects that cannot be immersed by brushing on HG "rust remover" undiluted with a brush. Depending on the amount of rust, leave to work for between 10 minutes and several hours. Finish by thoroughly washing off with water. Depending on the amount of rust, the treatment may be repeated if necessary.

Attention: Transport and store the bottle upright. When you use this product on painted or varnished surfaces, or surfaces treated in any other way, the protective layer will have to be reapplied. Wear rubber or plastic gloves. Be careful with calciferous surfaces. Medical personnel can request the data sheet via +31 (0)36 54 94 777 • The consumer's information sheet can be obtained via www.HG.eu
